

Automated Excretion Care System

MINELET 爽

Sensor automatically runs the system.

MINELET 爽

Helps keep your patients clean!

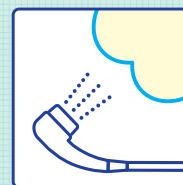

It is as simple as connecting the specially designed diaper and turning on the system. Excrement is suctioned to a vessel and a warm water shower is provided.

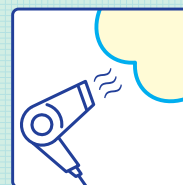

Sensors sense existence of excrement

Excrement is automatically suctioned

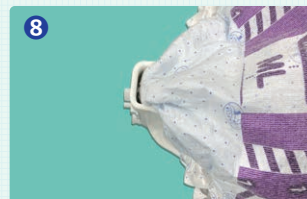

Warm water is used to clean the area

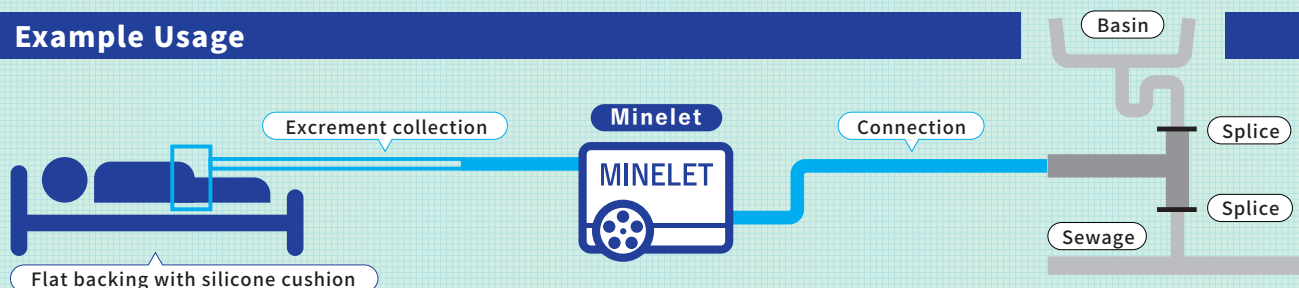

Area is dried

Installing the diaper to the Minelet adapter

Example Usage

- Excrement is automatically drained via hoses.
- Hassel-free and odor-free

- Use only 1 specially designed diaper per day
- No need to change diapers during operations

- Display number of solid and liquid excrements
- Easily log data for patients
